🔗 https://jacksonmori.vercel.app/ 📍 San Gabriel

SUMMARY

Experienced full-stack and blockchain developer with a proven track record of designing, developing, and deploying robust, scalable, and secure web and blockchain-based applications. Proficient in a wide range of programming languages, frameworks, and technologies, including JavaScript, React, Node.js, Solidity, Ethereum, and various databases. Skilled in agile software development methodologies, DevOps practices, and cloud computing. Passionate about staying up-to-date with the latest industry trends and technologies to deliver innovative solutions that meet or exceed client requirements.

EXPERIENCE

Full Stack & Blockchain Developer
InvoZone

03/2021 - 04/2022
Toronto, Canada

- Designed and developed full-stack web applications using React, Node.js, and various databases (MongoDB, PostgreSQL).
- Implemented secure and scalable blockchain-based solutions using Ethereum, Solidity, and Truffle framework.
- Collaborated with cross-functional teams, including product managers, designers, and other developers, to deliver high-quality software.
- Optimized application performance, security, and scalability through the use of best practices and cutting-edge technologies.
- Participated in the deployment and maintenance of applications on cloud platforms (AWS, Google Cloud).
- Contributed to the development of internal tools and libraries to improve development efficiency and code quality.

Full Stack Developer & Lead Smart Contract Developer
XWP

04/2018 - 01/2021
United State·Remote

- Designed and developed decentralized applications (dApps) using Ethereum, Solidity, and web3.js.
- Implemented smart contracts to handle the core functionality of the dApps, ensuring security and correctness.
- Integrated blockchain-based solutions with traditional web applications using APIs and microservices.
- Researched and evaluated new blockchain technologies and platforms to identify the most suitable solutions for client requirements.
- Collaborated with project stakeholders to understand business requirements and translate them into technical specifications.
- Participated in the deployment and maintenance of blockchain-based applications on various platforms (Ethereum, Hyperledger).

Frontend Developer
TEKHQS

01/2015 - 03/2018
United States · Remote

- Hands-on experience in front-end technologies including React, jQuery and HTML5.
- Develop front end, back end & info model for web application components.
- Participate in product development, from ideation to deployment.
- Work in a cross-functional team to deliver a complete user experience.
- Experience of working with micro services-based architecture at backend.
- Comfortable with rapid development cycles and tight schedules.
- Experience working with remote teams on Agile and Collaborative Development Models.

SKILLS

React · Next.js · Angular · Vue.js · Svelte · React Native

Node.js · ExpressJS · Python · Django · Flask

Microsoft SQL Server · MongoDB · MySQL · PostgreSQL

Amazon Web Services · Firebase · Google API · OpenAI API

EDUCATION

Bachelor's degree, Computer Science

Tokyo Institute of Technology

09/2010 - 04/2014

PROJECTS

Kwerty

React, Redux, Bootstrap, NodeJS, ExpressJS, MongoDB, ChartJs

- The Main Objective of the Kwerty Website is to provide data regarding what users search on the website. There will be a set of data added by the super admin from the super admin panel by uploading an excel or CSV file and that data will be added to the database.

Crypto Trading & Exchange

React, Redux, Redux-Saga, Bootstrap, HTML/SCSS

- A crypto exchange is a digital marketplace where traders can buy and sell crypto coins using different fiat currencies or altcoins. A cryptocurrency exchange is an online platform that acts as an intermediary between buyers and sellers of the cryptocurrency.
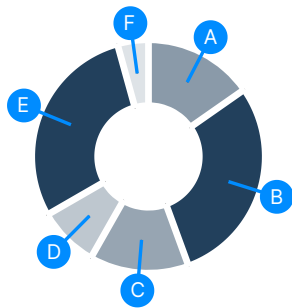

EXPERIENCE

Freelance
Upwork

04/2014 - 12/2014

United States ·
Remote

- Developed mobile and web applications, including expertise in programming languages like Java, Python, and JavaScript.
- Launched 6 websites including 2 large business websites.
- Performed daily maintenance of code, debugging issues, and solving clients' problems.

MY TIME

A Meditation.

B Obsessing over design & planning.

C Thinking about next one more thing.

D Fasting and trying out diets

E Implementation

F Checking out what I've done.

PROJECTS

Crypto Trading & Exchange

React, Redux, Redux-Saga, Bootstrap, HTML/SCSS

- A crypto exchange is a digital marketplace where traders can buy and sell crypto coins using different fiat currencies or altcoins. A cryptocurrency exchange is an online platform that acts as an intermediary between buyers and sellers of the cryptocurrency.

Crypto AML (Anti-Money-Laundry)

React, Bootstrap, Node.js, Express.js, MongoDB, Mongoose, Redux, Redux Saga, D3JS

- Crypto AML Adapter, standardizes and aggregates (Anti-Money-Laundry) risk score from any Crypto AML sources. Use and run the API in your AML process to get a comprehensive, resilient, scalable, AML compliance platform fully provider agnostic, reducing your operational risk, technological dependence at a most beneficial cost, and more importantly improving the quality of your compliance decision.
